Understanding cables

Every cable message consists of three parts:

- The top box shows each cables unique reference number, when and by whom it originally was sent, and what its initial classification was.
- The middle box contains the header information that is associated with the cable. It includes information about the receiver(s) as well as a general subject.
- The bottom box presents the body of the cable. The opening can contain a more specific subject, references to other cables ([browse by origin](#) to find them) or additional comment. [1](#)1. (C) On March 1, Poloff raised ref a points with MFA D1

Directorate for International Organizations and
Nonproliferation officer Dionyssios A. Kyvetos. Kyvetos
confirmed that Greece had not been invited to, nor did it
send any officials to participate in, the February 22-23 Oslo
cluster munitions conference. Reiterating his position from
an earlier discussion on ref b points, Kyvetos said Greece
agreed with the U.S. position that favored dealing with
cluster munitions within the framework of the Convention on
Conventional Weapons (CCW) and not at a separate, non-binding
conference such as the one held in Oslo. Kyvetos was
somewhat surprised and disappointed that certain nations,
such as the UK, Japan, and France, who he claimed in November
2006 had been opposed to a separate conference dealing with
cluster munitions, in the end signed the joint statement at
the conclusion of the February Oslo conference.
